

Smart Attachments 1.18.8

New in this release

The new version of add-on includes the following features:

- Added support for the default JIRA mailbox when you send emails with attachments and this address is automatically inserted as Reply to in the email. Now you can set up the mail handler and process the incoming emails with the attachments stored in them.
- Added an option to post the email copy to the issue comments when you send an email with attachments manually or through the post-function.

Fixed in this release

- Resolved the issue with inserting images into the Description field and comments from the clipboard.
