

# Smart Attachments 1.18.9

## New in this release

**Integrated the category selection field with the Add attachments form in JIRA Service Desk.**

Now you can select the appropriate category when attaching files by drag-n-drop in JIRA Service Desk.

The screenshot displays the JIRA Service Desk interface with the 'Add attachments' modal open. The modal has a text editor at the top with the content: 'Hi Larry!', 'Please check the following things in your system.', and 'Thanks.'. Below the text editor is the 'Attachment Category' dropdown menu, which is currently set to 'Screenshots'. A blue callout box with the text 'CATEGORY SELECTION FIELD' and 'Select the appropriate category when uploading files in Jira Service Desk.' points to the dropdown menu. The modal also shows a list of attachments, including 'Uncategorized', 'Documents', 'Screenshots', 'Screencasts', and 'Archives'. At the bottom of the modal, there are buttons for 'Share with customer', 'Add to issue only', and 'Cancel'. The background shows the JIRA Service Desk header with navigation tabs like 'Dashboards', 'Projects', 'Issues', and 'Boards', and a sidebar with various icons.
