

TeamCity Integration for Jira 2.8.0

New in this release

The Fixed in build field gets support for multiple build configurations.

Now you can define multiple build configurations for selecting one or multiple builds from different configurations.

CRITERIA FOR BUILD SELECTION
Define the criteria for selecting one or multiple builds against the defined builds configurations.

MULTIPLE BUILD CONFIGURATIONS
Select multiple build configurations for populating the Fixed in build field with build numbers.

The screenshot shows the Jira Administration interface. The sidebar on the left contains the following sections:

- ISSUE TYPES
 - Issue types
 - Issue type schemes
 - Sub-tasks
- WORKFLOWS
 - Workflows
 - Workflow schemes
- SCREENS

The main content area is titled 'Set Custom Field Defaults' and includes a search bar and a 'Back to project: Favorite Pages' button. The 'Issues' tab is selected in the top navigation bar. The configuration page is for the 'Fixed in Build' custom field. The 'Selection Criteria' section has two radio buttons: 'Single build (one against selected build configurations)' and 'Multiple builds (one against each build configuration)'. The 'Build Tracking' section has five radio buttons: 'Most recent build (successful or failed)', 'Most recent successful build', 'First successful build', 'First build (successful or failed)', and 'Manual'. The 'TeamCity' dropdown is set to 'StiltSoft TeamCity'. The 'Project' dropdown is set to 'Customer Case'. The 'Build Configuration' dropdown is set to 'cloud - AWS deploy (prod)'. There is an 'Add' button below the dropdowns. Below the configuration section, there is a list of build configurations with up and down arrows for reordering:

- StiltSoft TeamCity » Favourite Pages for Confluence » Branches with Sonar
- StiltSoft TeamCity » Smart Attachments » Master
- StiltSoft TeamCity » Smart Attachments » Master IT
- StiltSoft TeamCity » Customer Case » cloud - AWS deploy (prod)

At the bottom of the page, there are 'Set Default' and 'Cancel' buttons.

Output of the number of the build which addresses the issue on the Scrum and Kanban board cards.

Now you can quickly view the number of the build while viewing the development progress on the Scrum and Kanban boards.
