Table Filter and Charts 4.2.0

New in this release

- Added support for the year and quarter date formats for the Time Line/Area reports.
- Added the tentative drawing of the trendline in case of insufficient values in the source table.
- Added an option to define shortenings for worklog units for foreign languages.

Fixed in this release

- Improved the export of charts to PDF and image quality.
- Resolved the issue with the export of the hidden total columns and collapsed columns or rows of the Pivot Table macro to PDF.
- Resolved the issue with custom filter labels.
- Resolved the issue with calculation of worklogs having fractional values.
- Resolved the issue with operation of the Table Filter macro when the number of filters on the pane and in the page storage is different.
- Resolved the issue with the nested table with filter.
