

Talk for Confluence 3.5.0

New in this release

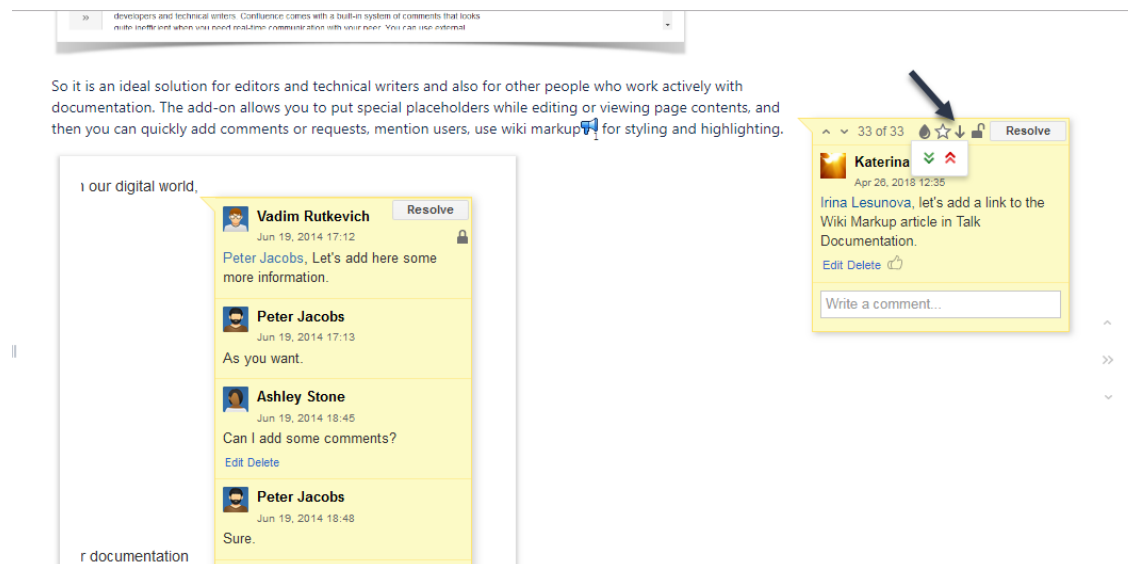

- Prioritizing discussions.
- Tracking discussions in a space with Talk Report.

Prioritizing discussions

Now you can set a priority of a Talk discussion.

You can use it:

- to let your team mates know how fast to respond and take action
- prioritize tasks discussed in different threads
- prioritize your personal to-dos captured in Talk discussions

Tracking discussions in a space with Talk Report

With a new Talk Report, you can manage the resolution of Talk inline comments in a space. It is handy when you have many discussions spread over multiple pages. This report will give you an overview of all Talk activity:

- in a space
- on a subset of pages
- on a specific page

Space Shuttle Talk Report

Created by Peter Jacobs, last modified less than a minute ago

Page	Initial comment	Priority	Status	Discussion author	Mentions	Date started	Date resolved
LIST OF FLIGHTS	@Alex , could you add links to these tests on the page?	✓	ARCHIVED	Peter Jacobs	Alex	Apr 25, 2018 10:20	
PROGRAM RETIREMENT	@Irina Lesunova , this program got updates last month. Could you check in with @Alex and see what needs to be changed on this page?	✓	OPEN	Peter Jacobs	Alex , Irina Lesunova	Apr 25, 2018 10:17	
SHUTTLE DESCRIPTION	@Alex , the image is not rendered here for some reason. Please look into this asap.	⬆	RESOLVED	Peter Jacobs	Alex	Apr 25, 2018 10:22	Apr 25, 2018 10:24
SPACE SHUTTLE PROGRAM IN NUMBERS	Let's make it bold to make it stand out.	⬇	OPEN	Peter Jacobs		Apr 25, 2018 10:19	
SPACE SHUTTLE	I suggest we add more facts and examples here.	⬇	OPEN	Peter		Apr 25	

Talk Report includes the following information:

- Name of a page where an inline comment was created
- Link to an inline comment
- Initial comment
- Priority of an inline comment
- Status (open, resolved, archived)
- Discussion author
- Users mentioned in a discussion
- Date when a talk was started
- Date of talk resolution

Resolved talks are stored only starting from the version 3.5.0. The report does not include talks that were resolved prior to updating to v.3.5.0.
