File Viewer 1.1.1

Fixed the issue with opening large STL files in 3D Viewer.

Fixed in this release

- Fixed the issue with opening large stl files in 3D Viewer. The issue could cause a browser to crash. Now the maximum size of a STL file that can be opened in 3D Viewer is 64 MB. Larger files will not be rendered in the viewer. The 'Download file button' will be shown instead.
- Fixed the issue with stl files not downloading by clicking the 'Raw file' link when the 'View as 3D model' option is chosen.
