

TeamCity Integration for Jira 2.9.0

New in this release

The new version of the app includes the following features:

- Optimized response of UI elements and data queries that improved performance and data loading on the TeamCity tabs and in gadgets.
- Unified the date format used across the app sections. Now the app relies on the date format defined in the Jira settings and shows all the dates accordingly.

Fixed in this release

- Resolved the issue with display of build data when opening the Teamcity tab for a specific issue in the Issue Navigator view.
