

Table Filter and Charts 4.2.5

New in this release

- Added compatibility with Data Center read-only mode.
- Added a capability to show one-day tasks in the Gantt chart.
- Improved the Gantt chart to show tasks' end date inclusively.
- Hiding the source table of a chart doesn't hide pagination and links of the source table macro. Table Excerpt macro can be used to hide it.

Fixed in this release

- Resolved the issue with parsing dates with Polish months names.
- Resolved the issue with impossibility to set colors for Pie and Gantt charts when there are html special characters in the chart labels.
- Resolved the issue with impossibility to set colors for Gantt chart when editing the page.
