

Table Filter and Charts 4.2.7

New in this release

- Improved performance.
- Table Filter macro Total Row / Column option outputs values with user defined decimal separator.
- Added compatibility of Sparkline charts with worklog and time intervals.

Fixed in this release

- Resolved the issue with setting charts date format when viewing the page.
- Resolved the issue with missing options in dropdown filters when *Update dropdown filters* option is set and *Multi-filter operator* is set to *OR*.
- Resolved the issue with not working Hide Columns filter when *Multi-filter operator* is set to *OR* and no filtration is applied.
- Resolved the issue with missing the last Total cell when Total Row and Total Column are set and filtration is disabled by default.
- Resolved the issue with missing Sparkline charts when filtration is disabled by default.
- Resolved the issue with missing the last cell of Sparkline charts when Total Row and Total Column are set and disabling / enabling filtration.
- Resolved the issue with not working sorting of a column with IP addresses in the page editor.
