

Table Filter and Charts 4.2.8

Fixed in this release

- Resolved the issue with Pivot Table macro when tablesorter.js is not available on the page.
- Resolved the issue with not working [Freeze first N columns](#) option with Jira Issues macro.
- Resolved the issue with setting colors for the icons based chart in the Chart from Table macro when editing the page.
- Resolved the issue with visible Pivot Table controls inside Chart from Table macro with a hidden source table.
