Awesome Graphs 1.4.0

StiltSoft is happy to announce the release of Awesome Graphs for Stash version 1.4.0.

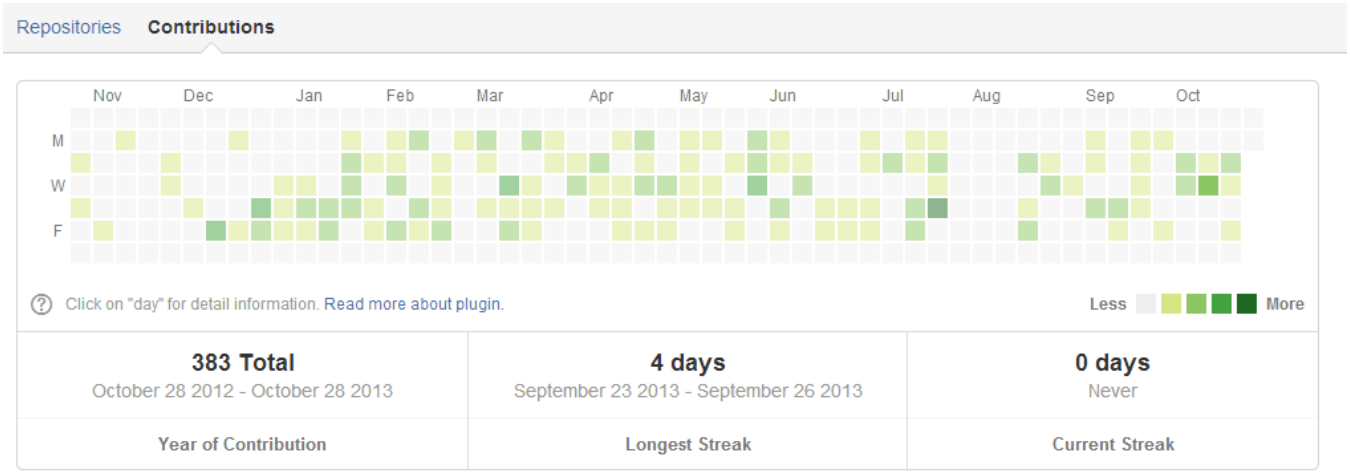

What's new

This major release adds the Contributions statistics.

Contributions

This new feature lets you keep track of every commiter's personal activity across all your Git repos. In a Stash user profile, you can see a new tab with a calendar showing all commiter's contributions: commits and JIRA issues affected by commits, as well as pull requests.

Clicking a day in the calendar shows a detailed stats for this day in terms of user contributions. Apart from that, you also can check the total of all contributions over the last year and periods of continuous activity called streaks.
