

# Table Filter and Charts 4.3.1

## New in this release

- Added an option of columns sorting in the page edit mode for macOS with the Cmd+Click shortcut.
- Added an option to display the same type of data labels in 2D and 3D pie and donut charts when hovering over data labels.

## Fixed in this release

- Resolved the issue with the dot type of line in line charts.
- Resolved the issue with the line settings interface in line and timeline charts in the page edit mode.
- Resolved the issue with displaying data labels in 3D pie and donut charts on existing pages.
- Resolved the issue with a [sticky header](#) layout when the hide columns filter type is applied.
- Resolved the compatibility issue with the Content Formatting app.
