

Smart Attachments 1.20.0

New in this release

Added automatic distribution of uploaded files across categories according to the defined rules.

Now you can configure the automatic distribution rules and let the app to automatically distribute files across categories according to the specified rules.

Smart Attachments

Here you can define categories for your attached files. Categories will allow you distribute attachments among the appropriate categories for easier access to these files. The added categories will become available in the Attachments section. You can drag files to the appropriate category for storing within it. You can reindex attachments in the add-on administration section.

Enable Smart Attachments for project☒
