

Smart Attachments for Confluence 1.2.0

New in this release

Added support for quick links to embed documents into Confluence pages.

Now you can quickly embed documents from space storages into your Confluence pages by pasting the link on a page from your clipboard.

The screenshot displays the Confluence Space Storage interface. At the top, there's a navigation bar with 'Confluence', 'Spaces', 'People', 'Microblog', 'Create', and a search bar. Below this, the 'Space Storage' section is visible. A table lists documents with columns for Title, Size, Uploader, and Actions. A blue callout box with the text 'Copy the link to quickly embed documents into Confluence pages by pasting the link from the clipboard' points to a button labeled 'Copy link to embed document' which is located next to the 'Smart Attachments - Endpoint Testing.xlsx' file. The table also shows dates for each document.

The new version of add-on also includes the following features:

- Added the highlighting of the newly uploaded documents and newly created folders in the space storage.
- Added integration of the app with Google Analytics for tracking key product events. Please see our [Privacy Policy](#) for details.

Fixed in this release

- Resolved the compatibility issues with the Excellentable app.
- Removed output of the excess entries in the Confluence log.
