

Smart Attachments for Confluence 1.3.0

New in this release

Added an action to move documents to another folder.

Now you can move documents to another folder or space storage if it was accidentally uploaded into the incorrect location.

The new version of the app also includes the following features:

- Sorting of documents and folders by name, creator, creation and last modified dates.
- Icons to indicate the type of stored files.
- Display of the user profile dialog when hovering over the uploader name.
