No Email Storm 2.0.0

StiltSoft is happy to announce the release of No Email Storm for Confluence 2.0.0

What's new
Version 2.0.0 doesn't require the Speakeasy extension to be installed.

Get Rid of Speakeasy

This version works perfectly without Speakeasy. Admins still can enable No Email Storm for certain groups and individual users can enable\disable it in their profile settings. The version is compatible with Confluence versions 4.3 - 5.3.
