

# Talk for Confluence 1.7.8

## New in this release

Added support for purchase of the add-on license on Atlassian Marketplace. Now you can acquire the add-on license either on our [website](#) or from [Atlassian](#). Buying licenses on Atlassian Marketplace gives you a range of benefits as follows:

- quick, secure and convenient license purchase;
- easy tracking of all transactions and products;
- receipt of notifications about expiry of licenses and other important events.

Now you can also generate an evaluation license on our [website](#) or [my.atlassian.com](#).

All the recently purchased licenses will be soon migrated to Atlassian Marketplace. If you already have a purchased license, it will continue working as before.

## Fixed in this release

- Corrected behavior of the add-on when generating preview of the page with the placed talk, now no notification is sent until the page is saved.
