Specify the date format when adding the Date Filter type

The new version of the app also includes the following features:

- Improved hints when adding filters and setting filter values in the Table Filter macro.
- Added the information messages when using combinations with other macros and apps.
- Added Russian localization.
- Added an ability to set the Total row title in the Table Filter macro.
- Added an option to place filters on the filtration pane according to their adding sequence in the Table Filter macro.
- Added an indicator of unsaved changes.
- Changed the order of setting chart parameters in the Chart from Table macro.

## Fixed in this release

- Resolved the issue with broken filters and table scrolling after changes canceling (using Ctrl+z) in the page edit mode.
