Talk for Confluence 4.0.0

> ⓘ **You can install Talk 4.0 only if you use Confluence 5.7 and above.**

New in this release

- Add Suggestions on a page to propose changes.

Add Suggestions on a page to propose changes

Now the app allows you to add not only inline comments, but **suggestions** as well. This is a totally new functionality.
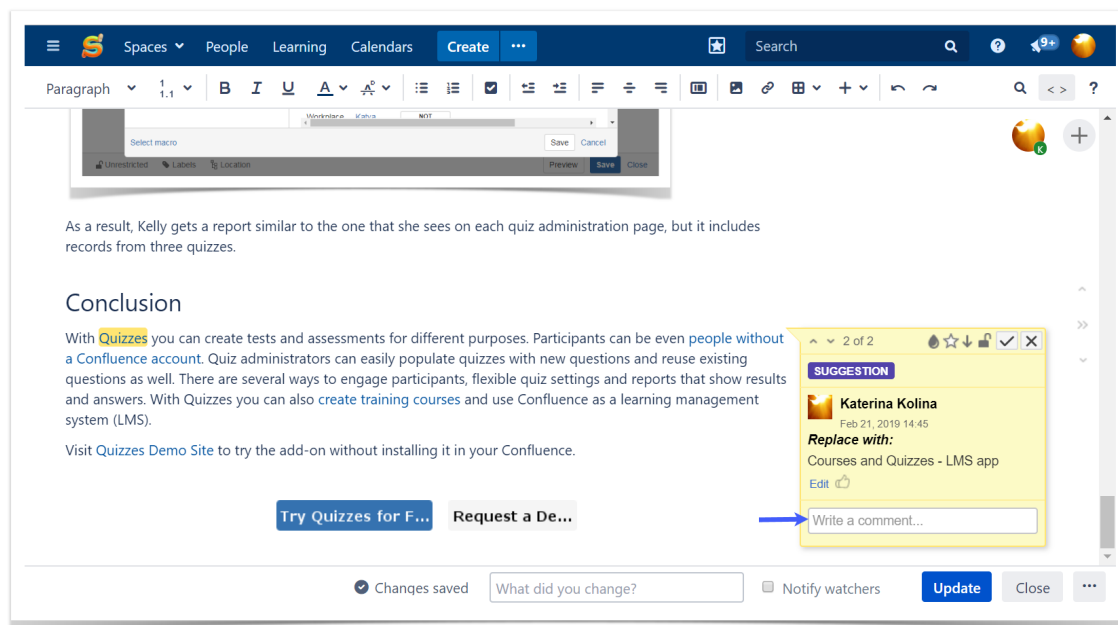

Use Cases

- Suggest content improvements
- Reviewing a page
- Inform about a typo

You can use **Suggestions** to propose changes on a page and let page owners decide whether to accept them. Accepted changes are automatically applied (no need to edit the page). While rejected suggestions disappear and can be tracked in page history.

Suggestions work both **while viewing** and **editing** a page. And it is possible to comment on a suggestion to add a note or explanation to your proposition.
