

Table Filter and Charts 5.0.3

New in this release

- Added compatibility for [RefinedMobile for Confluence](#) app.
- Improved the options search in dropdown filters.
- Added a capability to format numbers without decimals.

Fixed in this release:

- Resolved the issue with Table Transformer macro when source tables contain columns with mixed content type.
- Resolved the issue with wrong table columns width in the app PDF export when some columns are hidden by Table Filter macro.
- Resolved the issue with deleting a row with merged vertically cells inside Table Filter macro.
- Resolved the issue with floating page toolbar.
- Resolved the compatibility issues with Confluence 5.9 and older.
