Adding the TeamCity Gadgets

All the gadgets are available in **Jira Server** only.

TeamCity Integration for Jira add-on allows you to add three gadgets on Jira dashboard:

- TeamCity Agents gadget displays the list of agents connected to TeamCity and available for build execution.
- TeamCity Activity gadget displays the build activity stream for available Jira projects and associated issues.
- TeamCity Build Configurations gadget displays the list of the recently completed builds for the selected build configurations and allows you to remotely trigger builds on TeamCity server from Jira dashboard.
