

TeamCity Integration for JIRA 1.7.0

New in this release

The add-on has received support for multiple TeamCity servers.

The add-on allows you to add as many as needed TeamCity servers and keep an eye on all your projects, builds and agents at once.

The new version of add-on also includes the following features:

- Added support for new TeamCity 8.1;
- Added output of information about start time of data indexing on the Troubleshooting page;
- Added output of percentage of data indexing on the Troubleshooting page.

Fixed in this release

- Corrected output of the relevant warning messages in JIRA.
