## Viewing Builds and Deployments in Development Section

## Viewing the Latest Builds

You can view the latest builds for a specific issue per each build configuration.

- 1. Open the issue that you want to see deployment for.
- 2. In the issue, locate the Development section.
- Click the line with builds. This opens the form with the list of builds. You can click each build to view its details in TeamCity.
- Here you can view both generic builds and builds of the Deployment type.

## Viewing Deployments

You can view build deployments for specific issues. The app supports builds of the Deployment type and shows them in issues which they relate to.

- 1. Open the issue.
- 2. Locate the Releases section.
- 3. Click the line with release.

The app will show the list of build deployments that relate to the current issue. You can click a specific deployment to transition to TeamCity and view details on it.

For each deployment you can view the following:

- status of deployment (successful or unsuccessful)
- · build configuration for deployment
- branch which the build was deployed from
