Table Filter and Charts 5.0.25

New in this release:

- Added a capability to output the Table Filter macro total column to the Pivot Table macro.

Fixed in this release:

- Resolved the issue with not showing export to PDF and CSV buttons if the export to Word is not enabled in the Table Transformer macro.
- Resolved the minor issue with the Table Filter macro UI when hovering over the "=" and "" signs.
- Resolved the issue with the colors setting in the Chart from Table macro settings.
- Resolved the issue with inline macro insertion when using multiple Advanced Tables - JSON Table that output tables with nested tables.
