

Table Filter and Charts 5.0.28

New in this release:

- Total values are aligned to the right in the Table Filter macro.

Fixed in this release:

- Resolved the issue with not working "Hide filtration pane" option when "Hide control buttons" option is set in the Table Filter macro.
- Resolved the issue with not showing today's events in the Gantt chart.
- Resolved issues with nested Table Filter macros when calculating total row and column.
