Table Filter 3.0.0

New in this release

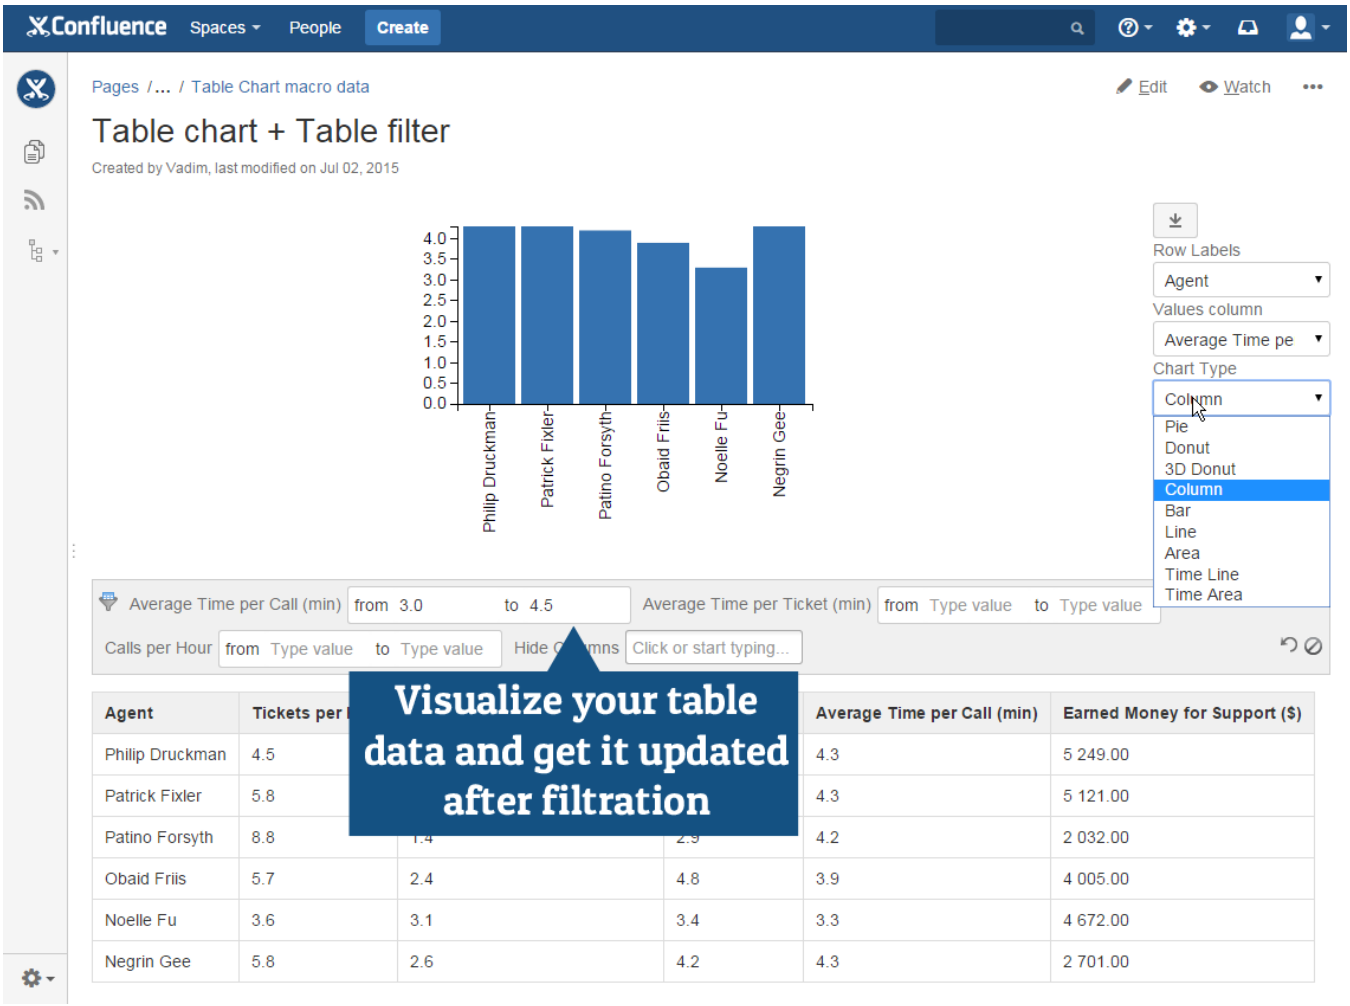

Added a capability to generate a pivot table with summarized data on the basis of a source data table.

Now you can quickly and easily get the pivot table with aggregated values throughout the source data table. Additionally, you can always select which type of operation perform on summarized data values.

Added a capability to generate charts with their automatic update upon filtration.

Now you can generate visual appealing charts with the automatic update of charts each time you filter data in your source table.

Agent	Tickets per			Average Time per Call (min)	Earned Money for Support ($)
Philip Druckman	4.5			4.3	5 249.00
