

Spreadsheet Issue Field Editor - Getting Started

Spreadsheet Issue Field Editor is a solution that allows you to quickly update issues during planning, backlog grooming, or prioritization session. It provides you with the following capabilities:

With Spreadsheet Issue Field Editor, you can update the list of Jira Cloud issues without opening each task one by one. Add updates and change values of fields inline and on the fly.

With the app you can do the following:

- backlog prioritization
- task distribution and assignment
- sprint or version planning
- backlog grooming
- project scope review
- requirement management
