

# Talk for Confluence 2.2.2

*Several bug-fixes and optimizations*

## Fixed in this release

- Discussions real-time update could slow down Confluence server with Talk 2.2.0-2.2.1.
- Talk icons aren't displayed in PDF export of a page now.
- Confluence 5.6 compatibility is improved. Archived discussions on a page could lead to odd warnings in the editor.
- Firefox compatibility is improved. In some cases discussion sidebar could be erroneously hidden.
- Documentation theme compatibility is improved. In some cases Talk could change left sidebar width accidentally.
