Smart Attachments for Jira Cloud - Getting Started

Smart Attachments for Jira lets you tag documents with labels and use them for better file searchability in Jira issues. Now you can instantly find the required document in a blink of an eye.

You can use the app to:

- tag attachments with labels
- filter attachments by label
- group attachments by label
- group attachments by date
- group attachments by uploader
- perform bulk operations with attachments
- configure validators
- search for issues with a specific attachment
