Scatter plot (use case)

> ℹ You can build a Scatter plot with the help of the Line chart type and its Line settings.

Use Case:

There's a data table with two columns: 'Signups', 'Page views'.

You need to show the relationship between page views and the number of signups of a website on the chart.

Solution:

1. Wrap the table with the Chart from Table macro.
2. Choose the Line chart type.
3. Set X-axis, Y-axis value column in the chart controls.
4. Switch to Look tab, click Line settings, choose Dot as a type of the line, and its size.
5. Specify other options if needed.
