# Handy Timestamp

ⓘ This feature is available starting from the Handy Macros for Confluence 1.3.0.

About the feature

Task tracking in Confluence can be more informative if you know when exactly your tasks were changed or completed. You can quickly write down when you released a new software version or when you sent a contract to your customer with the simple Handy Timestamp macro.

Inserting Handy Timestamp

1. Insert the Handy Timestamp macro on the page.

hh - hour in am/pm (1-12)	02
mm - minute	01
ss - second	01

Using Handy Timestamp hotkey

You can quickly add the Handy Timestamp macro to the page by using the key combination. Press **Ctrl+Alt+T** combination when editing the page.

ⓘ

You can disable this feature if you do not need it in your Confluence.

To disable this feature:

1. Navigate to **Confluence administration** > **Atlassian Marketplace** > **Manage add-ons**, then choose **Handy Macros**.
2. Expand the list of add-on modules.
3. Disable the **Insert Handy Timestamp Hotkey** module.
