Inserting the macros

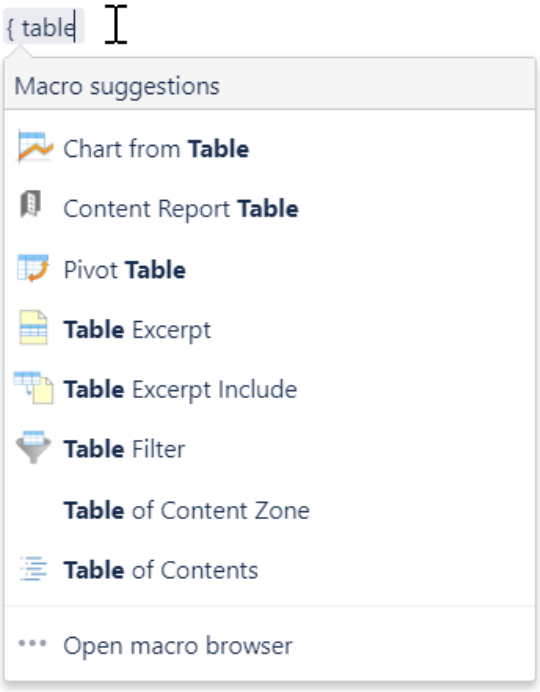

In the page view mode

To enable live filtration in headers:

1. Click the  button on the top right corner of the page beside the Edit button.
2. Click Enable in the dialog.
3. Start filtering data in table headers

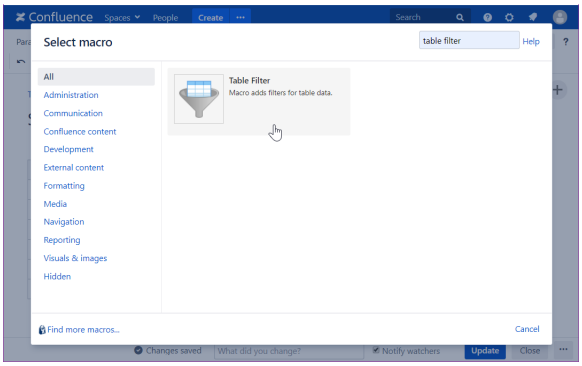

Manual entrying

1. Switch Confluence page to the edit mode.
2. Position the mouse pointer in the appropriate place on the page.
3. Start entering
    - **{Table Filter}, {Pivot Table}, {Chart from Table}, {Table Transformer}, {Table Excerpt}, {Table Excerpt Include}, {Table from CSV}** (for the legacy editor on Cloud)
    - **/Table Filter, / Pivot Table, /Chart from Table, /Table Transformer, /Table Excerpt, /Table Excerpt Include, /Table from CSV, /Table Toolbox** (for the new editor on Cloud)
4. From the prompted list of macro choices, select the macro.
5. Place the table within the macro.

Selecting in the Select macro form

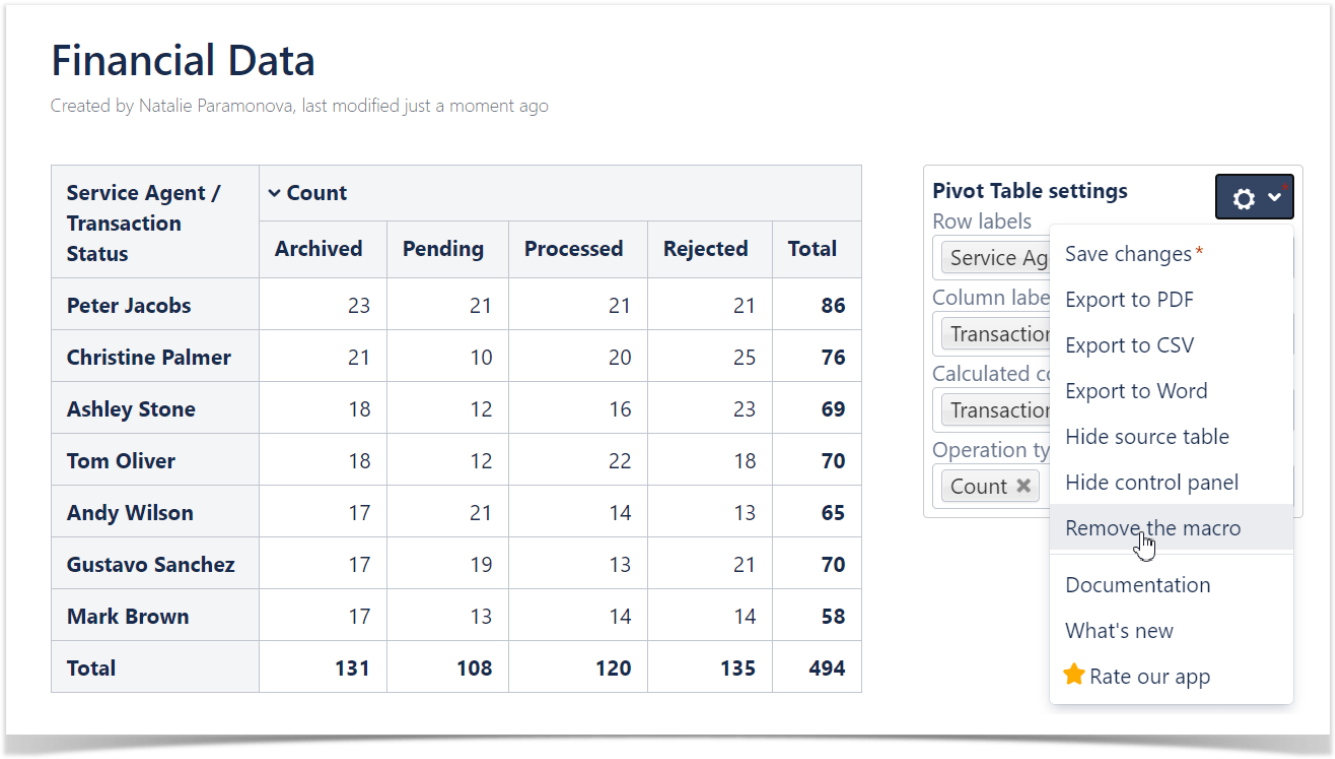

1. Switch Confluence page to the edit mode.
2. Position the mouse pointer in the appropriate place on the page.
3. On the editor pane, click **Insert more content -> Other macros**.
4. In the **Select Macro** form, find the macro and insert it on the page.
5. Place the table within the macro.

Removing the macros from tables

In the page view mode (Table Filter, Pivot Table, Chart from Table)

1. Click the cogwheel icon on the filtration panel or on the pivot table or chart control panel.
2. Select the Remove the macro option.
3. Click Remove in the dialog.

In the page edit mode (all the macros)

1. Switch Confluence page to the edit mode.
2. Copy the table and paste it outside the macro body.
3. Select the macro and click Remove.
