

Table Filter and Charts 7.1.0

New in this release:

Added the capability to show page titles of included tables with the Table Excerpt Include macro.

Edit 'Table Excerpt Include' Macro

Table Excerpt Include macro allows you to use the mirrored copy of table for building multiple pivot tables and generating several charts on the basis of the same table data.

Fixed in this release:

- Resolved the issue with shifted columns in the Table from JSON macro when some columns are missing in some rows.
