

# Where to view builds information, logs, artifacts and perform actions

The app allows you to view build results, access logs and artifacts via direct links, and perform build actions from Bitbucket. At the moment, the list of actions include:

- **Build the latest commit** — running a build for the latest commit
- **Re-build this commit** — re-running a build for a particular commit

You can get builds' data and act on them from different places in Bitbucket:

- [Builds page](#)
- [Pull requests page](#)
- [Commits and Branches pages](#)

## Builds page

On the **Builds** page, you can see the results of all builds from a particular repository, access their logs and artifacts via direct links, or perform build actions.

To perform build actions from Bitbucket you first need to [authorize via access tokens](#).

The screenshot shows the Bitbucket interface for the 'selenide' repository. The top navigation bar includes 'Bitbucket', 'Projects', 'Repositories', and 'People'. A search bar is on the right. The left sidebar contains various icons, with a red arrow pointing to the 'Builds' icon (a circular arrow). The main content area is titled 'Builds' and shows a list of builds for the 'master' branch. The builds are as follows:

Build	Status	Updated	Logs	Artifacts	Actions
<b>Selenide / Build #20</b> <span>LATEST</span> Dmitry Trofimov  9ceed1bb5e4 #1346 Fixed paths in ScreenShotLaboratoryTest to be OS independent	<span>In progress</span>	A moment ago 1 sec	<a href="#">Logs</a>	<a href="#">Artifacts</a>	...
<b>Selenide / Build #19</b> Administrator  f68dc93a584 #1345 improve message of waitUntil/waitWhile methods	<span>732 passed</span>	32 mins ago 1 min 56 sec	<a href="#">Logs</a>	<a href="#">Artifacts</a>	...
<b>Selenide / Build #18</b> Administrator  118dfcf441a fixed waitUntil method	<span>732 passed</span>	3 hours ago 2 min 20 sec	<a href="#">Logs</a>	<a href="#">Artifacts</a>	...
<b>Selenide / Build #16</b> Daniel H. Peger  42234083350 #1344 Fixed OS dependencies in integration tests	<span>Failed</span> 543 passed	3 hours ago 2 min 7 sec	<a href="#">Logs</a>	<a href="#">Artifacts</a>	...

At the bottom of the page, there is a footer with the text: 'Git repository management for enterprise teams powered by Atlassian Bitbucket', 'Atlassian Bitbucket v7.8.0', and links for 'Documentation', 'Request a feature', 'About', and 'Contact Atlassian'. The Atlassian logo is also present.

## Pull requests page

On the **Pull requests** page, the latest build status is shown in the **Overview** tab and the **Builds** tab provides builds' logs and artifacts and allows to act on builds.

To perform build actions from Bitbucket you first need to [authorize via access tokens](#).
