

Smart Attachments 1.3.0

New in this release

Added a capability to select the appropriate category when uploading files through the **Attach Files** and **Attach screenshot** forms.

The screenshot shows the 'Attach Files' form. At the top, there's a header 'Attach Files'. Below it, the 'Attachment Category' is set to 'Project Management' in a dropdown menu. The 'Attachment' section features a dashed box with the text 'Drop files here to attach them' and 'or' above a 'Select files' button. Below this, two files are listed: 'licenseReport-2014-11-11.csv' and 'Quote - 2014-11-25.pdf', each with a green progress bar and a close icon. The 'Comment' section has a text area containing 'Attaching the updated files.' At the bottom, there are icons for help and a lock, followed by the text 'Viewable by All Users'. The bottom right corner has 'Attach' and 'Cancel' buttons.

The new version of add-on includes the following features:

- Added output of the progress bar when uploading files to the category.
- Added output of the warning message when renaming the attached files.
- Moved the Perform Bulk Operation action to the add-on contextual menu and made the block visible only when this action is selected.
- Added output of empty categories as collapsed when viewing the issue.
- Added a capability to set restrictions for the uncategorized attachments.
- Added validation of unique category names.

Fixed in this release

The new version of the add-on has been optimized, as follows:

- Removed the close icon from placeholders of users, user groups and project roles when viewing the configuration of attachment categories for the project.
- Disabled a capability to perform bulk operations on attachments (moving to category and removal) when the issue is closed.
- Applied the automatic applying of the modified file name after file renaming without a necessity to reload the page.
- Resolved the issue when the project administrator was not able to create attachment categories.
- Resolved the issue with expanding categories after re-ordering in Mozilla Firefox.
- Resolved the issue with the incorrect output of checkboxes when performing bulk operations while viewing issues in Issue Navigator.
