

Table Filter and Charts 7.2.0

New in this release:

- Added a capability to filter the table by entering **@pageTitle**.
- Added the following SQL functions: MULT, LOG.
- Added the possibility of displaying the text repetition counting in charts.
- Improved performance of the app.

Fixed in this release:

- Resolved the issue with the standard page exporting to PDF and exporting to Word via Scroll Word Exporter.
- Resolved the issue with the displaying of a hidden source table in the page exporting.
- Resolved the issue with the Pivot Table freezing up using a cell value delimiter when repeated values are generated in one cell.
