

Table Filter 2/5/2015

New in this Release

The screenshot shows the 'Edit Table Filter' dialog in Confluence. A blue callout box at the top says 'Easily configure parameters of the filters' with arrows pointing to the filter configuration fields. A second blue callout box at the bottom says 'Preview and customize the filtration' with an arrow pointing to the table preview. The configuration fields include 'Column(s)' with 'Version', 'Supported JIRA Versions', and 'Type' selected; 'User Filtered Columns' with 'Release Date' selected; and 'Default Values for Filters' with 'Commercial' selected. The table preview shows columns for Version, Supported JIRA Versions, Release Date, Type, and Release Notes, with one row of data.

Easily configure parameters of the filters

Preview and customize the filtration

Version	Supported JIRA Versions	Release Date	Type	Release Notes
1.4.3		2014-12-24	Commercial	Resolved several issues and increased

Released the first public version of Table Filter for Confluence Cloud. It includes the following features:

- Filtration of table data through drop-down lists with values.
- Custom filtration of table data through text input fields.
- Filtration of multiple tables with data.
- Usage of default values for filtering tables.
- Filtration of the list with JIRA issues and task reports.
- Customization of filters.
- Showing or hiding the pane with filters
