

Smart Attachments 1.6.0

New in this release

Added a capability to edit MS Office documents online and save them as a new document revision in JIRA.

Now you can easily store all your Word documents, Excel spreadsheets, Power Point presentations and Visio diagrams in JIRA, edit them online in MS Office and save as new document revisions.

The screenshot displays the JIRA interface for an issue titled "Support Contract with Microsoft". A large blue overlay text reads: "Directly edit documents, workbooks, presentations and drawings in MS Office and automatically save them as new document revisions". Below this, the "Attachments" section is visible, categorized into Documents, Spreadsheets, Presentations, Drawings, and Uncategorized. A context menu is open over the "Microsoft Contract.docx" attachment, showing options: "Edit in Office", "Upload new revision", "Add comment", "Download all revisions", "Rename", "Move to Spreadsheets", "Move to Presentations", "Move to Drawings", and "Move to Uncategorized". To the right, a "Drag and Drop" area is shown with the text "Drop files here to attach them" and a "Select files" button. The top navigation bar includes "JIRA", "Dashboards", "Projects", "Issues", "Agile", "Structure", and a "Create" button. The issue details bar shows "Edit", "Comment", "Assign", "More", "Start Progress", "Resolve Issue", "Close Issue", and "Admin".

The new version of add-on also includes the following features:

- Added compatibility with JIRA 6.4.
- Added categorization of files when downloading them from the issue.

Fixed in this release

- Resolved the issue with errors in the catalina log files.
- Resolved the issue with the underlining of the comment icon when viewing in Internet Explorer.
- Added escaping for attachment file names.
