

Table Filter and Charts 7.6.0

New in this release:

- Added the capability to define custom decimal separators for the Table from CSV macro.
- Added the display of empty cells for tables from CSV which have empty values.
- Added the possibility to display all Table Excerpts with the same name from various pages.
- Added the capability to merge all Table Excerpts with the same excerpt and column names into one table automatically.
- Added zoom in Gantt chart.
- Added the "subtle" parameter into the Status macro when using the FORMATWIKI function in Table Transformer.
- Added the capability to print a PDF.

Fixed in this release:

- Resolved the issue with updating Pivot Table from Task Report when applying live filtration to the source Task Report macro.
- Resolved the issue with displaying commas in tables from CSV having both commas and tabulation.
