Table Filter and Charts 7.9.0

New in this release:

- Added the capability to select custom chart colors from a table.
- Added the capability to depict page version in the Table Excerpt Include page metadata.
- Added the capability to export a table with multiple links in a cell to CSV.

Fixed in this release:

- Resolved the issue with rounding values in the Pivot Table macro.
- Resolved the issue with a blank extra heading row in a table with merged header cells and frozen rows.
