

# Smart Attachments 1.6.1

## New in this release

### Added support for JIRA Agile.

Now you can quickly and easily manage attachments while planning the sprint in JIRA Agile.

The screenshot shows the JIRA Smart Board interface. On the left, there's a 'Smart Board' section with a search bar and filters. Below it, a 'Sprint #1' board shows four issues: SMART-1, SMART-2, SMART-3, and SMART-4. To the right, a detailed view of SMART-17 'New Edit File Capabilities' is shown. It lists attachments categorized into Document, Workbooks, Presentation, and Uncategorized. A context menu is open over the 'Test Workbook XLS.xls' file, showing options like 'Edit in Office', 'Upload new revision', 'Add comment', 'Rename', and 'Move to' various categories.

### Added support for Structure add-on.

Now you can efficiently manage and distribute attachments among categories while creating an issue structure in JIRA.

The screenshot shows the JIRA Global Structure interface. On the left, there's a 'Global Structure' section with a search bar and filters. Below it, a list of Smart Attachments (SMART-1 to SMART-17) is shown. To the right, a detailed view of SMART-17 'New Edit File Capabilities' is shown. It lists attachments categorized into Document, Workbooks, Presentation, and Uncategorized. A context menu is open over the 'Test Workbook XLS.xls' file, showing options like 'Edit in Office', 'Upload new revision', 'Add comment', 'Download all revisions', 'Rename', and 'Move to' various categories.

The new version of add-on also includes the following features:

- Added the automatic hiding of attachment names on the Activity tab for users with the restricted access to the categories, which files were loaded to.
- Modified the mechanism of downloading all attachments from the issue. Now the add-on samples the latest file revisions and groups them by category.
- Added the mechanism for cleaning the temporary document revisions and file archives stored on JIRA server when the user performed actions with attachments.
- Chaged to the manual selection of the required bulk operation instead of the pre-selected Delete Attachments action.

- Added output of the file renaming procedures on the Activity tab.

## Fixed in this release

- Resolved the issue with the display artifact in the JIRA menu ribbon.
- Resolved the issue with the removal of document with revisions when revisions were preserved after removal of the document.
- Resolved the issue with the non-working Download All Attachments action.
- Resolved the issue with checking access permissions to attachments after disabling the add-on.
