

Table Filter 2.2.6

Fixed in this release

- Increased the speed of data filtration in Internet Explorer 9.
- Resolved the issue with opening an invalid page or page reload when only one filter is specified and the user tries to enter a search query.
- Added compatibility with the User List macro and added escaping for special characters when filtering data.
- Resolved the issue with the broken Request a Feature link.
- Added output of the information message when a table is not available in the macro body.
