

# Customer Case - 4/22/2015

## New in this release

**Added a capability to create private forums with access restrictions by email domains and for particular users' emails.**

Now you can create private forums for internal use or for sharing with your colleagues or featured customers.

Edit forum restrictions: Customer Case Forum

Authentication

Restrictions

General access options

Here you can manage the general forum access options.

☒ This is a private forum

Private forum will be visible to authorized users only.

User's email domain restriction

Here you can restrict forum access for specified users email domains.

☒ Restrict access for specified email domains

Only users with specified email domains will be granted to access the private forum.

User email domain	Actions
stiltsoft.com	Delete
stiltsoft.org	Delete
<input type="text"/>	Add

User's emails restriction

Here you can restrict forum access for specified users emails.

☒ Restrict access for specified email domains

Only users with specified email domains will be granted to access the private forum

User email	Actions
user_example@stiltsoft.com	Delete
<input type="text"/>	Add

Define access restrictions to your feedback forums for email domains and individual users' emails.

**Added a capability to define availability of definite login options for each feedback forum.**

Now you can easily select which login options should be available to users and visitors of your feedback forums during signup.
