

Table Filter 2.3.0

New in this release

Added automatic row numbering and a capability to hide columns.

Now table rows are automatically numbered and you can regulate visibility of particular table columns.

The screenshot displays the Table Filter 2.3.0 interface. A blue callout box on the left reads "Activate the option to hide columns of your table" with an arrow pointing to the "Hide columns" checkbox in the settings panel. Another blue callout box at the bottom left reads "Enable automatic row numbering for your table" with an arrow pointing to the "Automatic row numbering" checkbox. The "Preview" window shows a table with columns: Order, OrderDate, Region, Rep, Item, Units, and Total. The "Hide columns" dropdown menu is open, showing a search bar with "Cost x" and a list of columns: Cost, Item, OrderDate, Region, Rep, Total, and Units. The "Item" column is highlighted in the dropdown. The table data includes rows for various orders, such as Order 1 with a total of 189.05 and Order 5 with a total of 1,619.19.

Order	OrderDate	Region	Rep	Item	Units	Total
1	1/6/2014	East	Jones	Pencil	95	189.05
2	4/1/2014	East	Jones	Binder	60	299.40
3	6/8/2014	East	Jones	Binder	60	539.40
4	7/12/2014	East	Howard	Binder	29	57.71
5	7/29/2014	East	Parent	Binder	81	1,619.19
6	8/15/2014	East	Jones	Pencil	35	174.65

The new version of add-on also includes the following features:

- Added a capability to limit the table height so the add-on will automatically fit the table height to your screen.
- Added a capability to export the filtered table to PDF or Word file.
- Added a capability to filter empty cells in the table.
