

TeamCity Integration for JIRA 2.0.0

New in this release

TeamCity integration for JIRA add-on works with TeamCity 8.1+ and JIRA 6.1+.

Added a capability to show TeamCity Activity gadget on the JIRA dashboard.

Now you can easily track the build activity on your TeamCity server and quickly access the related information.

TeamCity Activity

TeamCity Activity

Project Project01::Build02 — #9
Agent Default Agent started work at 2013-12-10 13:09 Spending time: 1m:30s

Tests: No tests

Show more...

Added the set of filters to narrow the range of builds matching the definite criteria.

Now you can instantly filter builds by status, build period, agent or project while viewing JIRA issues or the overall project.

Status: All

Build Period: All

Agent: All

Project: All

6 of 6 builds

Comment

The new version of the add-on also includes the following:

- Added output of the build configuration and branch name if the build was created from the featured branch.
