

Navigation between Discussions

You can **navigate between talks** by:

- clicking arrows in the top left corner of an active talk;

- clicking arrows near the right-hand sidebar toggling button;

Step #1. Eye Tracking

Stages:

1. Record eye movements at a distance with infrared camera
2. Allow the respondent to be seated in front of the device without attachments

⚠ Avoid eye trackers that integrate ordinary low-resolution webcams and use no infrared light.

What metrics do we derive?:

- using keyboard shortcuts: **8** to navigate to the previous talk and **2** to go to the next one.

Instead of scrolling down to the first talk on a page, you can click ▼ below the right-hand sidebar toggling button once you find yourself on the last talk.
