

Table Filter 6/15/2015

New in this release

Added automatic row numbering and a capability to hide columns.

Now table rows are automatically numbered. You can choose between dynamic and static row numbering.

Edit 'Table filter' Macro

≡ Set Filters' Default Values
Select default values for column filters.

≡ Set Width of filters
Specify width of generic and global filters.

Show First N Rows

Enter the number of table rows to show.

Automatic Row Numbering

Static

Dynamic

Static

☐ Fit Table to Screen Area

☐ Hide Filter Labels

☐ Hide Filters by Default

You can regulate visibility of particular table columns.

The new version of add-on also includes the following features:

- Added the hiding of the already selected values in filter boxes.
- Added a capability to filter empty cells in the table.
