

File Contributors

 This feature is available only in Awesome Graphs for **Bitbucket Server**.

Navigate to the **Source** tab on the sidebar. Select a specific file in the repository. Choose a file revision from the **History** menu and click the **Contributors** to open a drop-down list of all contributors who changed this file up to this revision.

Source

master | aui / src / js / aui.js

Source view | Diff to previous | History | Contributors

Contributors:

- Trey Shugart**
270 lines, 5 commits
- Don Brown**
212 lines, 1 commit
- Ben Buchanan**
54 lines, 7 commits
- Jonathon Creenaune**
21 lines, 3 commits
[View committer performance over the last year](#)
- Ben Wong**
18 lines, 4 commits
- Matt Quail**
16 lines, 1 commit

In the list you can see contributor names, a number of lines they changed in this file and a number of their commits that modified the file. If a contributor is a Bitbucket Server user, clicking their name will take you to the contributor's [Contributions](#) graph, where you can check contributor's overall performance and all their commits and pull-requests made over the last year/month/week.

To see all repository [contributors](#), scroll the list down to the end and click **View all repository contributors**.

Bitbucket Server also can show which lines were changed by a contributor. For that, click **Blame** and see the change log in the appeared sidebar on the left.
