

File Contributors

 This feature is available only under a commercial or evaluation license.

Navigate to the **Source** tab on the sidebar. Select a specific file in the repository. Choose a file revision from the **History** menu and click the **Contributors** to open a drop-down list of all contributors who changed this file up to this revision.

The screenshot shows the Atlassian UI interface for the 'Source' tab of a repository. On the left sidebar, the 'Source' tab is selected under the 'NAVIGATION' section. The main content area displays the 'Source view' of a file named 'au.js' in the path 'au / src / js / au.js'. A dropdown menu is open for the 'Contributors' tab, showing a list of contributors with their names, profile pictures, and statistics (lines changed and number of commits). The contributors listed are:

- Trey Shugart: 270 lines, 5 commits
- Don Brown: 212 lines, 1 commit
- Ben Buchanan: 54 lines, 7 commits
- Jonathon Creenaune: 21 lines, 3 commits (highlighted with a tooltip that says 'View committer performance over the last year')
- Ben Wong: 18 lines, 4 commits
- Matt Quail: 16 lines, 1 commit

In the list you can see contributor names, a number of lines they changed in this file and a number of their commits that modified the file. If a contributor is a Stash user, clicking their name will take you to the contributor's [Contributions](#) graph, where you can check contributor's overall performance and all their commits and pull-requests made over the last year/month/week.

To see all repository [contributors](#), scroll the list down to the end and click **View all repository contributors**.

Stash also can show which lines were changed by a contributor. For that, click **Blame** and see the change log in the appeared sidebar on the left.
