

TeamCity Agents Gadget

The TeamCity Agents gadget displays the list of agents connected to TeamCity and enabled for task completion. If you have several application links mapped to different TeamCity servers, the gadget will display agents for each TeamCity server individually.

What does it look like?

The **TeamCity Agents** gadget should appear as follows on the dashboard:

TeamCity Agents

TeamCity StiltSoft

Name	Connected	Enabled
tm7	Yes	Yes
Windows2012R2	Yes	Yes
Windows2012R2-2	Yes	Yes

Your Jira administrator should [configure TeamCity Integration for Jira](#) add-on, if you want to add the TeamCity Agents gadget to your dashboard. If you have added multiple application links to TeamCity servers in Jira, you will be able to select the appropriate application link for data output through the gadget.

Adding the TeamCity Agents gadget to your Dashboard

1. Go to your Jira [dashboard](#) and click **Add Gadget**. The **Add a gadget** form opens.

Add a gadget Manage gadgets ✕

TeamCity Build Configurations
By StiltSoft • Local
Displays the actual status of builds for the selected build configurations.

2. Into the search field, enter 'TeamCity' to filter the available gadgets.
3. Locate the **TeamCity Agents** gadget and click **Add gadget**. The **TeamCity Agents** gadget will appear on your dashboard as follows, ready for you to configure.

TeamCity Agents ⛶

Agents

TeamCity
TeamCity StiltSoft
TeamCity JetBrains

Select the appropriate TeamCity application links for display in the gadget

Save

4. Select the appropriate agents (application links) for display in the gadget and click **Save**.

Once you have saved the gadget, it will appear on your dashboard. The gadget will display the list of agents and their status. If you click the appropriate agent, you will be redirected to the page with information about this agent on TeamCity server.
